PRINCIPAL'S LETTER

“A positive attitude creates a chain of positive thoughts, events and outcomes”.

The year that passed was utilized as an opportunity to shift from the traditional way of learning to the digital way. As a leading school, we, with our commitment to provide the best solutions, we're successful in reaching every child and parent through a well planned and safe system of online classes, online PTM, online activities, E- Magazine, online examinations, and most importantly, we created and shared ample study materials and videos in Google Classroom to make things easy and accessible to the students. No doubt, we missed the physical presence and fun learning of the students with their peers in the classes.

For the new session, with a clear vision to “ Motivate, Educate and Empower our students by reinforcing their own expectations, we are all set to bring back the momentum in developing academics and other skills that include Bridge course, sports, craft, music, and dance which play a vital role in the growth of the students, and turn students into wholesome personalities by identifying, encouraging and fostering the latent potential in them.

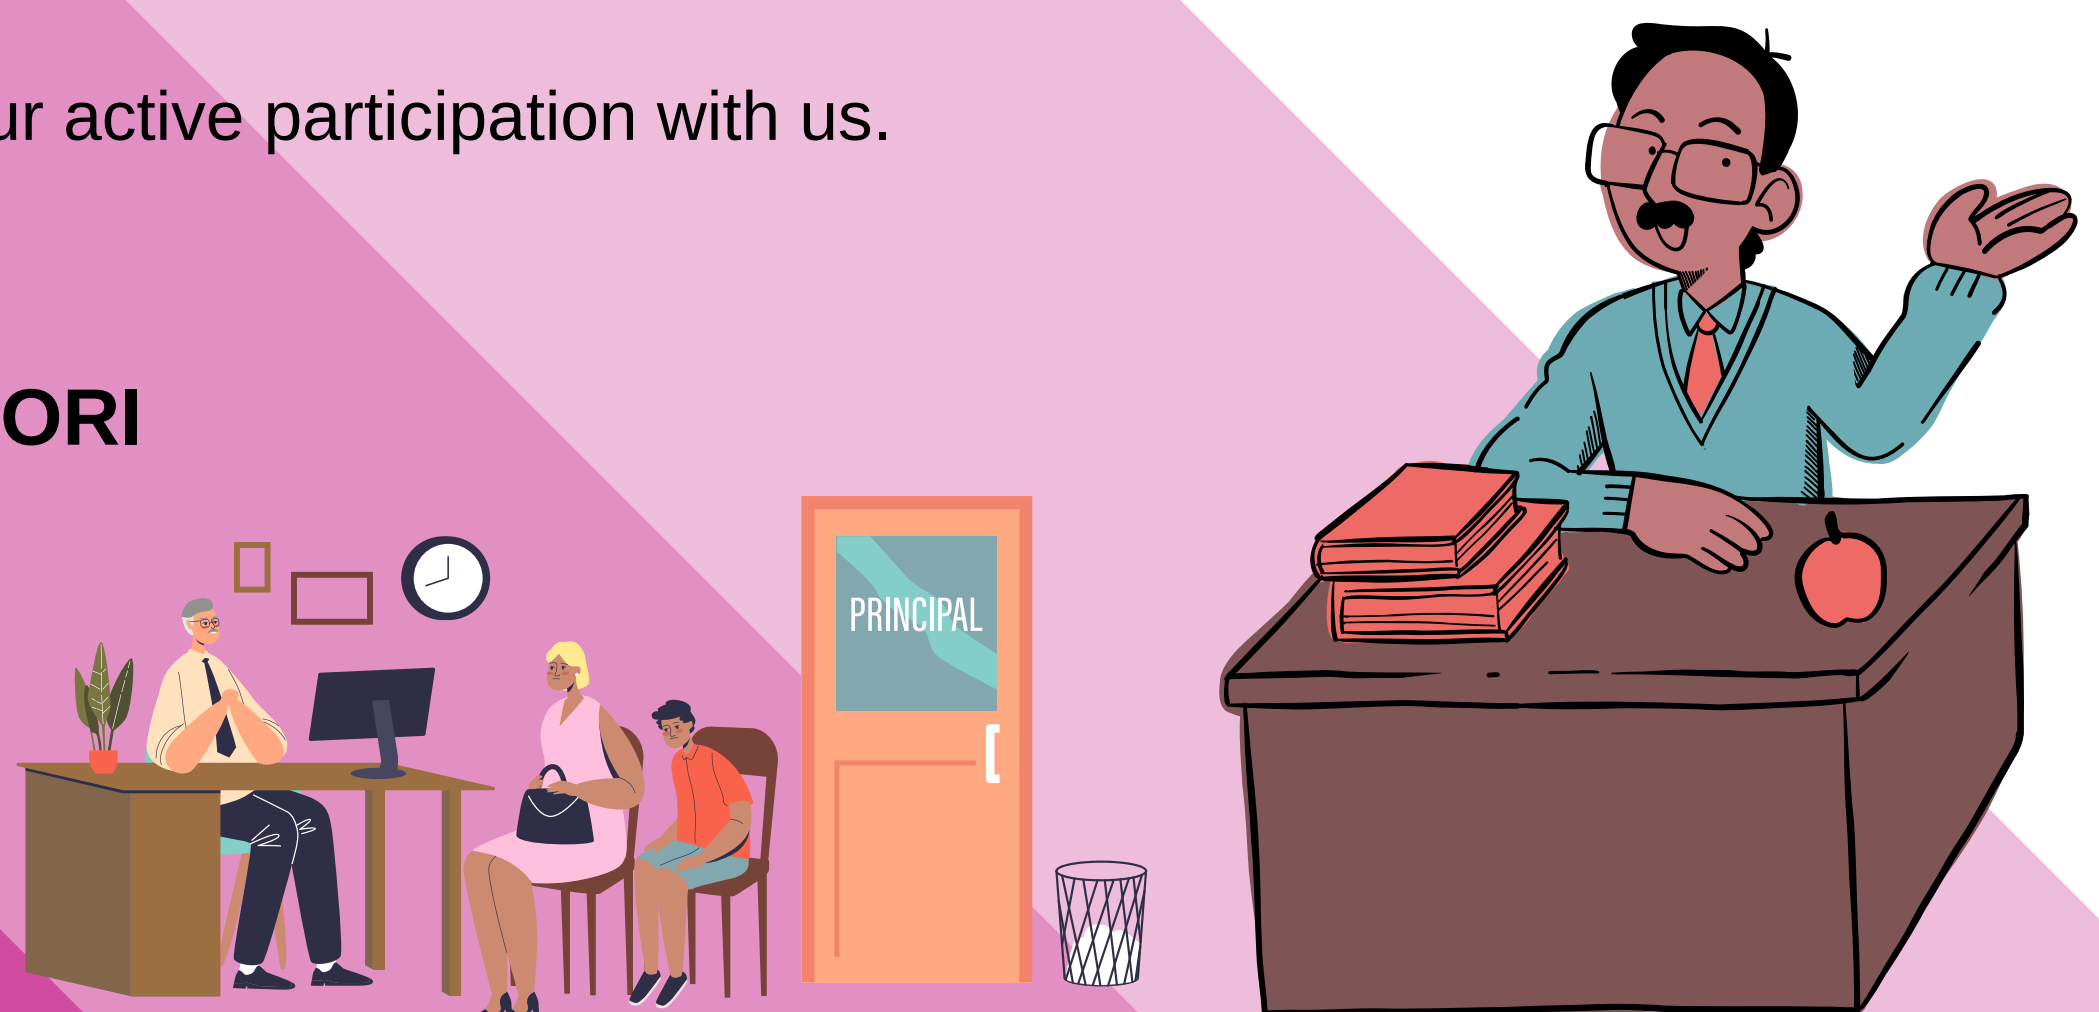

Under the guidelines of NEP 2020, we have designed a Social Development curriculum and instruction schedule that will inculcate 21st Century Learning; Literacy Skills, and Life Skills like Critical Thinking, Problem Solving, and Creativity through holistic & enjoyable child-centric, inquiry-driven, discovery-oriented approaches and also through peer tutoring, joyful activities on bagless days that have been scheduled in the academic calendar in the almanac.

A very well-planned calendar stipulating the year-round activities is incorporated in the Information Booklet to ensure maximum participation and encouragement of the students. You may kindly go through every page of this Information Booklet to learn about the functioning of the school, rules & regulations, dates & procedures about scholastic & co-scholastic activities during the session.

We look forward to your active participation with us.

Stay safe and healthy.

MS.PRATIBA SOPORI
PRINCIPAL

MENTOR SPEAK

**You pull me, my every splinter, fibre and string,
But I failed, by the passage of time.
I wish it could be a crime, for moments to pass
Because, it is a shame for us to part.**

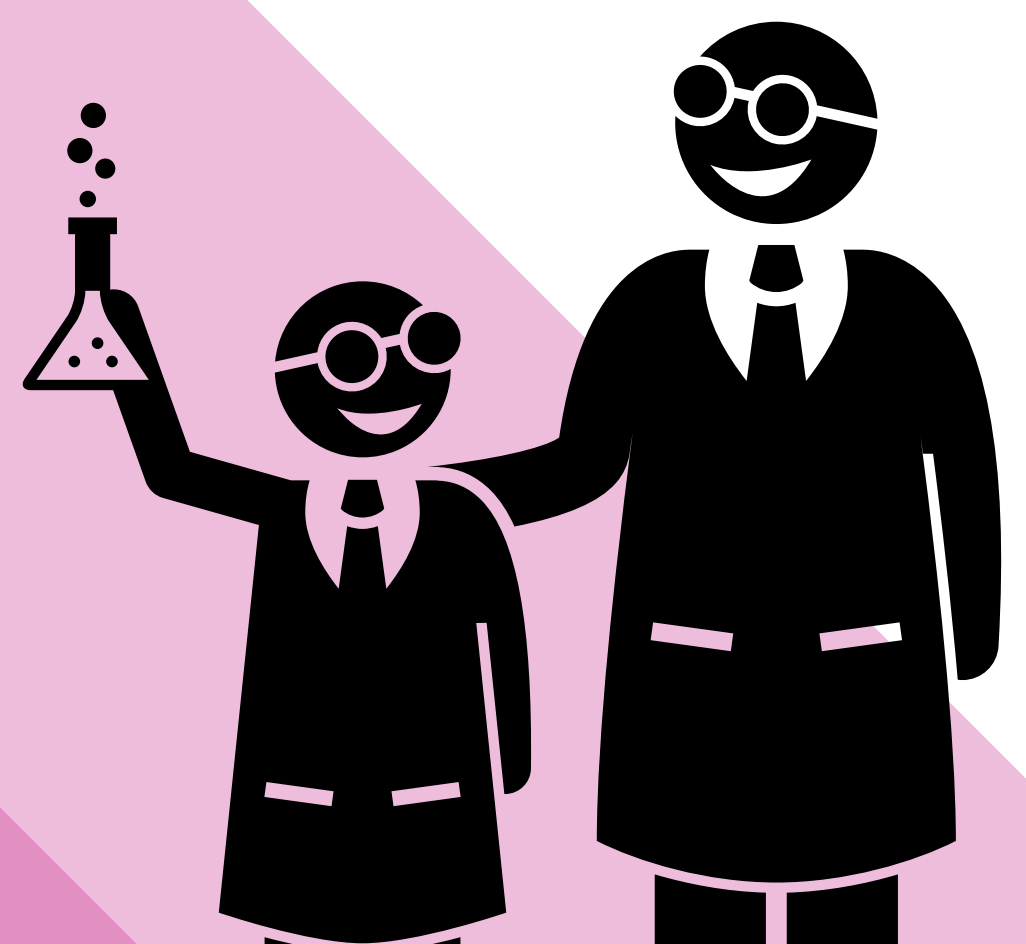

Well, nobody said it was going to be easy, but nobody said it was this hard. Accepting that part of the journey is also the end has been a struggle because, for me, this has been a journey of rumination, growth, friendships and most importantly of joy and pride. The Springer has been more than just a magazine that I have worked for to achieve fame, or for it to become another notch in the belt. It has been a source of great satisfaction.

Growing into the role of Editor in-Chief has had one constant --writing. Over the years, I have written countless pieces. Back when I started, like any Twenty seven year-old trying to achieve the label of being an intellectual, I wrote articles about worldly issues and abstract concepts I couldn't effectively comment upon. After innumerable rebukes and ten or fifteen articles, I realised that you don't write to sound smart, but to take joy in what you say and so that you can be proud after you put in hours finishing that piece.

I had exponentially improved my writing skills; in some instances, I viewed my skills as a means to an end. However, now I realise if something is a means to an end, you can never be dedicated to it and can derive no true joy from it. After this epiphany, I properly experienced the rush of connection with myself that writing provides me. But this is the first time I don't want to finish a piece of writing.

Like always, I have a deadline hanging in front of me, but I wanted time to stop, I want to rewrite every piece I ever wrote, just so I could be overwhelmed by the feeling of pride and accomplishment again. But, I want my editorial to just be a work in progress. So, ask away and take a step to determine your form of expression. The Springer has been my guiding light. It can be that for you too. It is a question of effort, effort and progress.

MS.ROOPALI RAJPUT

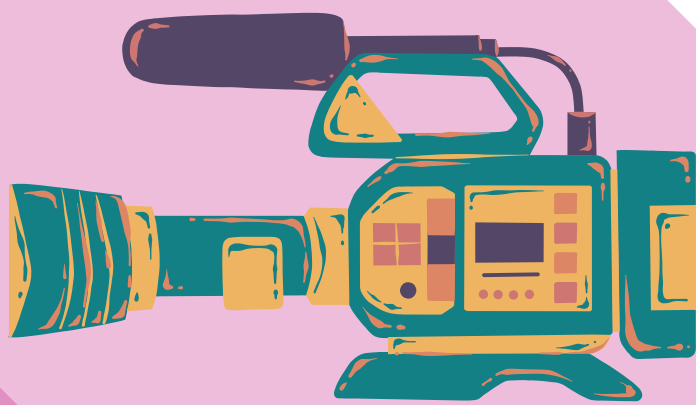

THINK ABOUT IT

"All that you touch and all that you see is all your life will ever be ."

~ Pink Floyd

The Springer - a magazine that represents Springers opinions, thoughts and vision. When you are a part of this board, it is a privilege. Since my time as a middle schooler, I aspired to be a part of the editorial board. This magazine has always provided opportunities to fellow Springers to express their share of opinions and thoughts to the school through this magazine. It was a conduct for me to share my opinions and thoughts. As time passed, I transformed from being a reader to a writer, from a writer to an editor for this magazine. Now, here I am writing my editor's take for the very same magazine. One word I associate with Springer is class. I have seen my juniors and batchmates giving it all to have a glance at this magazine, especially for the 'Literati Bytes and 'Those Looney ones section'. I remember those evening Online meetings , hustling for completing the work before the deadline. I have seen myself grow along with this magazine, I have always felt special, holding this magazine and flipping through its pages. From reading to writing one, The Springer has not only helped me express myself better but also pushed me to introspect on things differently. The best part of The Springer is that it is an opinionated magazine. During my time as an intern, I was assigned to write articles and collect them; back then it was a responsibility for me. Now being associated with this magazine for 2 years, working for this magazine has become a passion for me. It takes a lot to be a part of this magazine, you have to change your priorities, and even if you have an exam tomorrow, you are expected to work tirelessly for this magazine. Indeed your efforts for this magazines always deliver fruitful results. My emotions for this publication can't be just shared by mere words. The the question that I would like to put forth is --- "What does The Springer mean to you?" I will say for me this publication is invaluable, even more than my investments.

CLASS 10TH

SPRINGER UPDATE

ACHIEVEMENTS

HONORABLE MENTIONS

The Principal along with the Senior Fraternity was awarded with the Srijnatmak Yogyata Award on 8th March at Kc Regalia.

- Arab Chadha and Arav Mahajan of class 9th participated in the Inter School Competition (Optimized Brain) organised by Jodhamal School and got a Participation Certificate.
- Aniket Soni of class 6th participated in the Inter School Hindi Poem competition organized by Doon International School and got a Participation Certificate.
- Samil Kotwal of class 10th participated in the English Poem Recitation competition organized by DPS Udhampur and got a Participation Certificate.

(Primary Wing)

Intra Class Hindi Story Telling Competition
Winners of Class 1

- Kamini Bhat and Mavleen Kour stood first.
- Praneet kour and Vivan Gupta stood second.
- Raghav Singh and Ashmita Raina stood third.

Winners of Class 2nd

- Kritika Sharma stood first.
- Mayank Sharma and Mevaan Thappa stood second.
- Arav Dhar and Sanvi Bhat stood third.

Winners of Class 3rd

- Reet Sharma stood first
- Lakshay pandit stood second
- Saranyah Bhat stood third

Inter House Hindi Story Telling Competition (Class 4th and 5th)

- Diya Arora of Class 5th of Jhelum house stood first
- Rupal Jasrotia of Jhelum house and Ayush Sharma of Tawi house of class 5th stood second
- Rijul Banotra of Class 5th of Tawi house stood third

Intra Class General Quiz Competition (Class 1st)

- Asmeeta Raina, Daksh Baldotra, Raghav Singh Charak and Sathak Bhat stood first
- Aarav Verma, Abhimanyu Manhas, Satvik and Viraj stood second
- Daksh Koul, Erin, Mavleen Kour and Priyal Manhas stood third

Intra Class General Quiz Competition (Class 2nd)

- Mayank, Hartik Kalsi, Gargi Sharma, Saanvi Bhat stood first
- Ranbir Singh, Kritika Sharma, Snehashri Pal, Ransh Raina stood second
- Keshav Raina, Rudra Yadav, Lavanya Pandita, Udath Bhat stood third.

Intra Class General Quiz Competition (Class 3rd)

- Reet Sharma stood first
- Laksh Pandit stood second
- Arjun Gandral and Dhariya Goel stood third

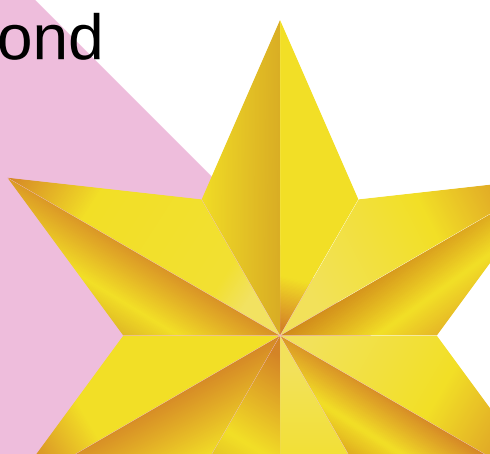

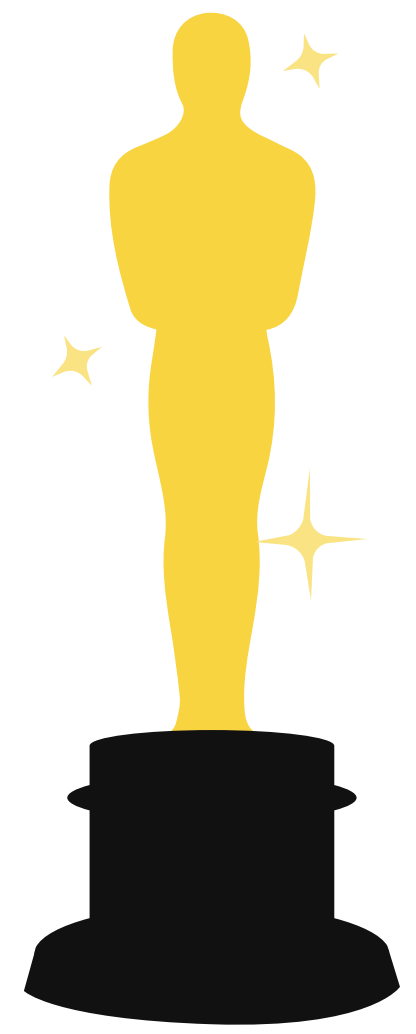

(Senior Wing)

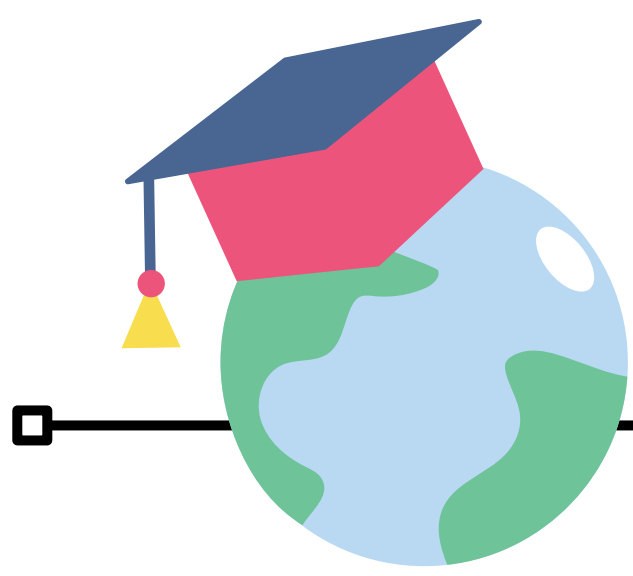

Winners of Inter House Steam quiz competition

- Anshu Mahato of class 10th, Pranjal Gupta of Class 9th, Ammanat Bhat of Class 8th and Ankit Mahata of class 6th of Jhelum House stood first.
- Arushi Verma of class 6th, Kanchan Kumari of class 7th, Anurag Brar of class 10th and Mayank Salaria of class 10th of Tawi house stood second.
- Arnav Chadha of class 7th, Aarav Mahajan of class 9th, Yuvika Rajput of class 10th of Chenab house stood third.

Winners of Inter House General Quiz Competition

- Diya Mehra of class 7th and Arab Chadha of class 9th of Chenab House stood first
- Palak Koul of class 6th and Kanchan Kumari of class 7th of tawi House stood second
- Vardan Manhas and Simrati Raina of class 7th of Indus house stood third

LITERATI BYTES

VALUE EDUCATION IN SCHOOL

"Children must be taught how to think, not what to think." Values are not the things that you could memorize but these are the qualities of an individual which defines the character of a human. Values are those qualities which make a real human being, a true one. These qualities we cannot buy from stores but we have to develop these qualities. Once we develop these moral values in our life, life will automatically become peaceful and happy. There are two kinds of education: one should teach us how to make a living and the other teaches us how to live a life. And the values are the kind of education which tells us how to live a life. Developing moral values is a never ending process. The life of a human is too short for gaining moral values. And also developing moral values is a toughest decision in today's world because moral values are becoming extinct in one's life. Nowadays we believe in a life which is selfish and full of arrogance. And in the book of moral values the first word is to become selfies. It teaches us to become kind, always think of others before you, respect all and so on, it makes our life on. It is peaceful, which is the desire of every individual. Design creates culture, culture shapes values and values determine the future.

KANIKA GUPTA

PRT TEACHER

WONDERS OF RAIN

When it rains,
All the water starts coming into the drains.
When it comes with the scary thunder,
All of us see it with some wonder.
It Satisfies the thirst,
Of the farmers first.
But the world is not so green,
Because the streets are not clean.
Oh! What a creation of nature,
The lifeline of every creature.

AVISHI

BLOOM

Life is good

JUST BREATHE

Frowning in my sleep.
Eyes too numb to know.
Can't contain the empty.
Smiles are fuelled by air.

How do I stop this?

Demons start to show.

Happy run on hatred No one is there.

Screams get louder and sharper.

I try to bite my tongues.

Everyone has a purpose.

But what am I to them?

Trying to breathe with no air.

Empty on empty again.

But it's not my own mouth,

Empty fills my lungs.

AYUSH SHARMA
CLASS 9TH

THE LOST WILL

I want to Google something
I don't know what
Anything that would distract me
from my forlorn thoughts .
I have a lot to do
but I accomplish none of it
I'll probably end up lonely
somewhere in a pit.
Life dealt me great cards
I am Just a bad player
but I can still turn it around
if I find a will somewhere...

PALAK AHUJA
CLASS 9TH

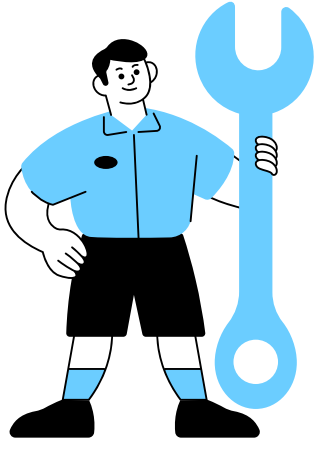

संपादकीय

**“डुबकियाँ सिंधु में गोताखोर लगाता है,
जा-जाकर खाली लौट आता है,
मिलें न मोती उसे, सहज ही गहरे पानी में,
बढ़ता हुआ उसका उत्साह इसी हैरानी में,
मुट्टी खाली उसकी हर बार नहीं होती,
कोशिश करने वालों की कभी हार नहीं होती।”**

उक्त पंक्तियों के संदर्भ में यह बात बिल्कुल सत्य है कि जो लोग कोशिश करते हैं, उनकी कभी हार नहीं होती। यदि बिना धैर्य खोए किसी कार्य को करने की निरंतर कोशिश की जाए, तो उसमें सफलता अवश्य मिलती है। कभी असफलता नहीं होती और साथ ही की गई कोशिश भी व्यर्थ नहीं जाती। पूरे मनोयोग और पूरी कोशिश के साथ किया गया प्रत्येक कार्य हमेशा फलदायी होता है। कोशिश करते हुए व्यक्ति को सफलता मिलने में कभी देर अवश्य हो सकती है, लेकिन सफलता मिलती अवश्य है। यदि कोई व्यक्ति सफलता मिलने में इस देर लगने के कारण ही हार मान लेता है, तो यह उसकी अपनी हार होती है। यदि इसी प्रकार मानव ने प्रारंभ में ही हार मान ली होती, तो वह आज भी जंगलों में ही भटक रहा होता और अपना शिकार ढूँढ रहा होता, लेकिन ऐसा नहीं है। कोशिश से ही मानव ने अग्नि पैदा की थी। उस समय भी मनुष्य ने गोताखोर की तरह हार नहीं मानी थी। उसने निरंतर कोशिश कर अनेक आविष्कारों को जन्म दिया था। इस तरह की छोटी-छोटी कोशिशें ही एक दिन किसी बड़े आविष्कार को जन्म देती हैं। मनुष्य द्वारा किए गए अनेक आविष्कार इस तथ्य की पुष्टि करते हैं। इसलिए हम आज जो कुछ करना चाहते हैं या कुछ बनाना चाहते हैं अथवा स्वयं कुछ बनना चाहते हैं, तो हमें उस दिशा में निरंतर कोशिश करते रहना चाहिए। इस कोशिश में हमें भी उस गोताखोर की तरह धैर्य और संयम रखना चाहिए, जो बिना धैर्य खोए संयम के साथ निरंतर कोशिश जारी रखने पर ही अंततः समुद्र की गहराइयों से कीमती मोती चुनने में सफलता प्राप्त करता है।

-सुषमा देवी
(हिंदी अध्यापिका)

सफलता की कुंजी- कठिन परिश्रम

कठिन परिश्रम ही सफलता की कुंजी है। हम कठिन परिश्रम से बड़े से बड़ा कार्य भी आसानी से कर सकते हैं। मेरा खुद का अनुभव है कि अगर कठिन परिश्रम करने का जज़्बा हमारे मन में हो तो हम कोई भी मंजिल पा सकते हैं।

मेरा खुद का अनुभव है कि जब तक कठिन परिश्रम नहीं किया जाएगा, तब तक किसी भी क्षेत्र में हमें सफलता प्राप्त नहीं हो सकती है। सफल व्यक्ति का समाज में सम्मान भी होता है। कठिन परिश्रम का उदाहरण हमें थॉमस एडीसन से मिलता है, उन्होंने अनेक बार कठिन परिश्रम करके अंत में बल्ब का आविष्कार किया। इसी तरह हमें दूसरों से प्रेरित होकर कठिन परिश्रम करते रहना चाहिए ताकि अपने सपनों को साकार कर सकें।

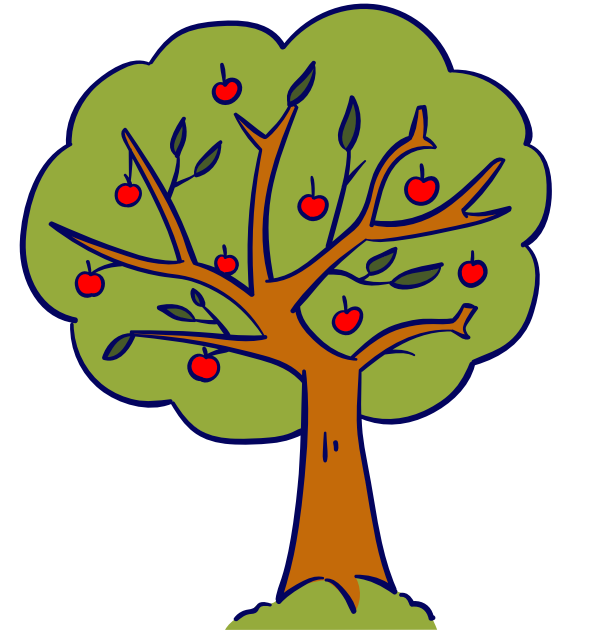

- कंचन देवी

LOCKDOWN

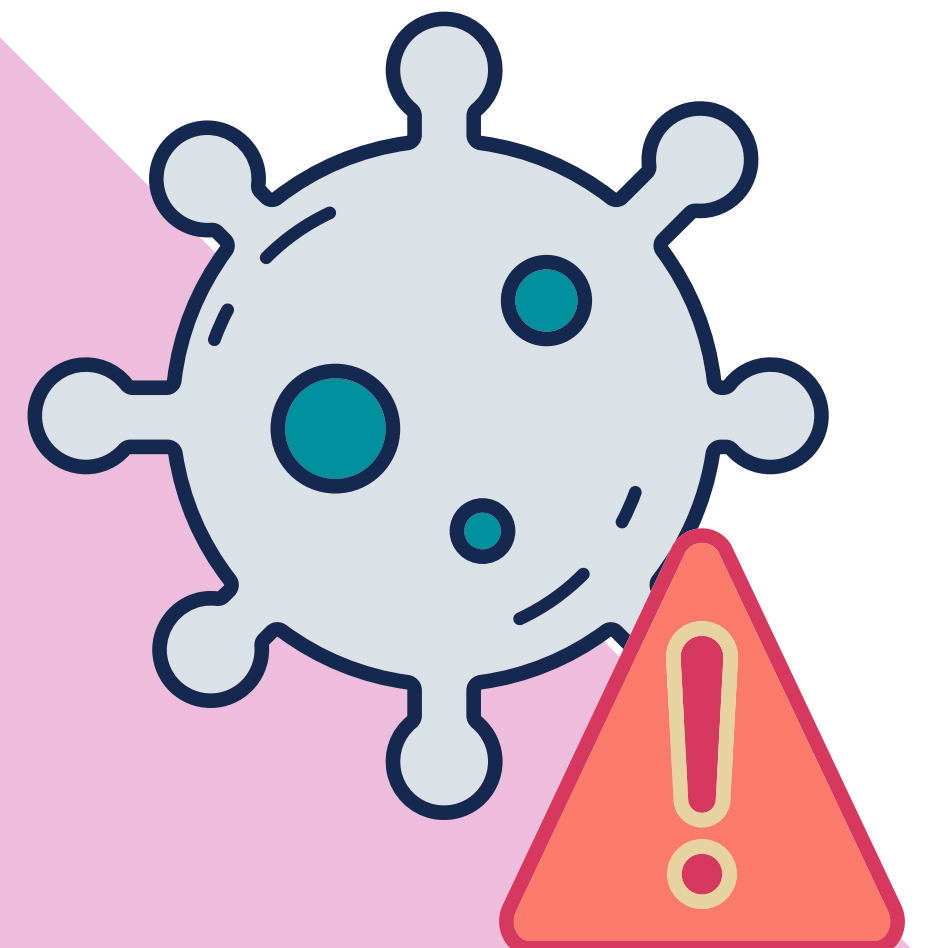

मेरा अनुभव....

लॉकडाउन का समय हम सब के लिए कठिनाइयों से भरा था क्योंकि हमें न सिर्फ अपना ध्यान नहीं रखना था बल्कि अपने परिवार का भी ध्यान रखना था। लॉकडाउन में हम सबको एक तरह से घरों में कैद रहना था जो कि मुश्किल था पर हमने अपने परिवार की सुरक्षा का ध्यान रखते हुए लॉकडाउन के नियमों का पालन किया। शुरुआत में लॉकडाउन से मैं बहुत खुश थी क्योंकि मुझे न तो स्कूल जाना पड़ता था और न ही स्कूल का काम करना पड़ता था फिर कुछ समय बाद सरकार ने यह सूचना जारी की कि हमारी ऑनलाइन पढ़ाई होगी। ऑनलाइन पढ़ना मेरे लिए नया अनुभव था क्योंकि पहले कभी मैं ऑनलाइन नहीं पढ़ी थी। उस समय के अनुसार ऑनलाइन पढ़ाई का विचार बहुत अच्छा था क्योंकि इससे हमारी पढ़ाई में कोई रुकावट नहीं आई हमें व्हाट्सएप के माध्यम से वर्कशीट भेजकर गृहकार्य दिया था। शिक्षक हम बच्चों को छोटी-छोटी वीडियो भेजकर गृहकार्य समझाते थे।

लॉकडाउन में मैं घर की सजावट करती थी और मैंने मम्मी के साथ घर के कामों में भी हाथ बंटाय़ा। लॉकडाउन का पहला महीना कब बीत गया, पता ही नहीं चला। मुझे लॉकडाउन के समय अपने परिवार के साथ समय बिताने का मौका मिला और अपने परिवार के सदस्यों को समझने का मौका मिला परंतु कुछ दिनों बाद सब कुछ बोरियत में बदल गया। न तो मैं बाहर खेलने जा सकती थी और न ही अपने दोस्तों से मिल सकती थी। लॉकडाउन में मेरे दोस्त मेरे साथ नहीं थे और मुझे उनकी बड़ी याद आती थी।

लॉकडाउन में सबसे खास बात यह थी कि मुझे अपने परिवार, दोस्तों के महत्त्व का पता चला। स्कूल में जो हम मज़े करते थे, और जब अध्यापक या अध्यापिकाएँ हमें पढ़ा रहे होते थे तो बीच-बीच में चुपके-चुपके हम बच्चे गपशप किया करते थे, मुझे इन सबकी बड़ी याद आने लगी लेकिन स्कूल नहीं खुल सकते थे क्योंकि उस समय कोरोना की वैक्सीन नहीं आई थी परंतु अब कोरोना की वैक्सीन भी आ गई है, टीकाकरण की प्रक्रिया भी आरंभ हो चुकी है। अब तो स्कूल भी खुलने लगे हैं इसलिए मैं बहुत खुश हूँ। लॉकडाउन का समय मेरे लिए नया अनुभव था जिसे मैं कभी भूल नहीं पाऊँगी।

- दीया शर्मा
कक्षा - आठवीं

कभी हार से हार मत मानो

हारने से भला क्यों डरते हो तुम,
हार से हार मत मानो,
अगर जीवन में कुछ करना है हासिल,
तो पहले हार का करो सामना तुम ।

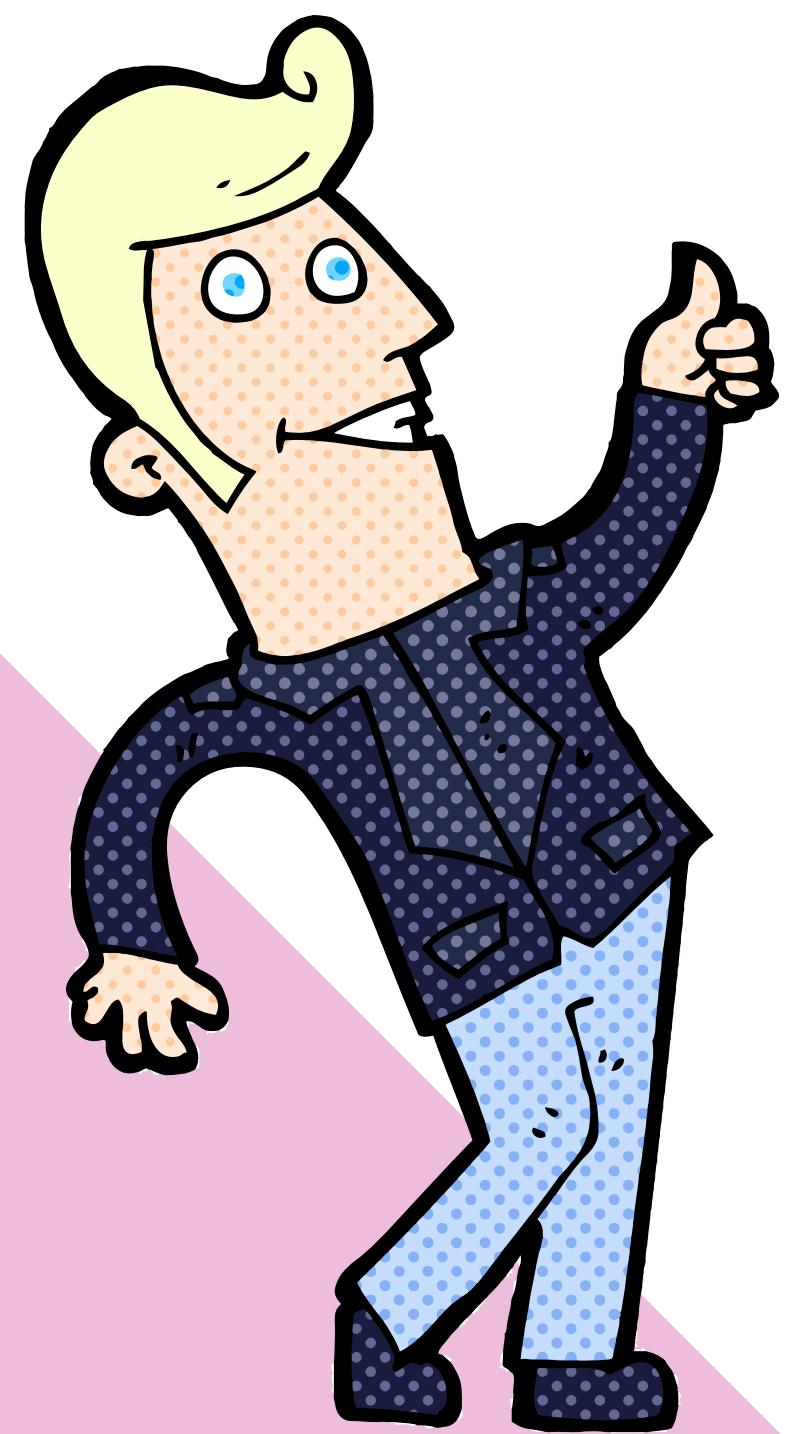

असफलता सफलता की पहली सीढ़ी है,
गिरकर संभलना ही तो ज़िंदगी है,
आँसू तो सिर्फ़ एक कमजोरी है,
इन आँसुओं को कभी ना बहाओ तुम ।

पहले हार का कारण पहचानो तुम,
बहाने भी ज़्यादा ना बनाओ तुम,
भाग्य और समय को दोष देना छोड़ो,
अपने अंदर नकारात्मक सोच मत लाओ तुम ।

हार तो सिर्फ़ एक ठोकर है,
ठोकर खाकर ही न गिर जाओ तुम,
गलतियों से अपनी हमेशा कुछ सीखो,
अपनी गलतियों को न दोहराओ तुम।

हार को जीत में बदलना हो,
तो दृढ़ संकल्प करो तुम,
समुद्र की लहरों की भाँति,
निर्मल बहते जाओ तुम,
परंतु ! कभी हार से हार न मानो तुम ।

- जानवी ठाकुर
कक्षा - दसवीं

THROUGH THE WORMHOLE

Everything has a beginning and an end and our universe is no exception to this rule. Our universe is constantly expanding, therefore it does not have a physical edge but it does have an edge of time. The universe will end one day with everything it contains but what will this phenomena look like and how will it happen? Let's start at the place we know the best - our solar system.

1 billion years from now the sun will be 10% brighter than it is today. This will increase the temperature on earth causing oceans to evaporate faster and extinguishing most, if not all, life on the earth. No one will be around to witness our next big event which is 4 to 5 billion years away. Right LP in a gravitational fight with a nearby galaxy called Andromeda. The two galaxies are racing toward each other at 250,000 miles per hour and will collide in 5 billion years from now. Astronomers predict that our solar system will remain intact as these two Titans battle it out. In five to eight billion years, the sun's nuclear furnace will undergo a dramatic shift causing it to expand to an enormous size and engulf Mercury, Venus and possibly the earth.

Our Sun isn't the only thing expanding, so is the entire universe and that expansion is accelerating up. If the expansion continues to accelerate then in 100 billion years, the distance between galaxies will increase so fast that light from galaxies will no longer reach us. We won't be able to study any galaxies beyond our cosmic neighbourhood called the local group.

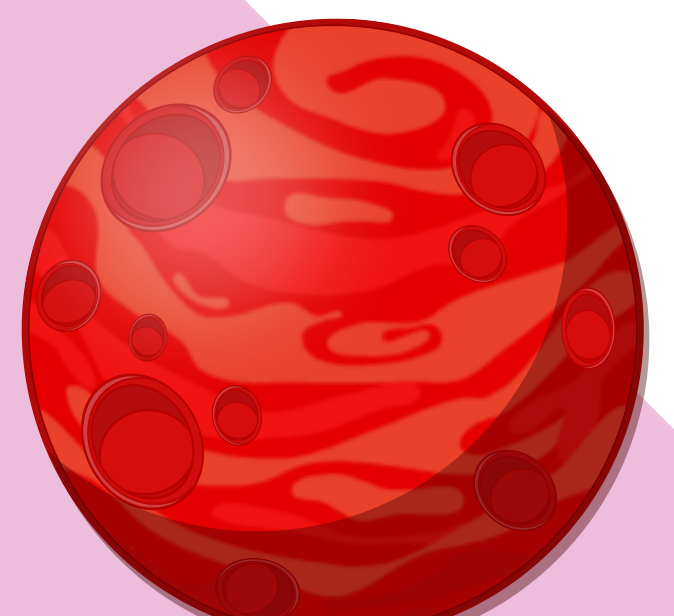

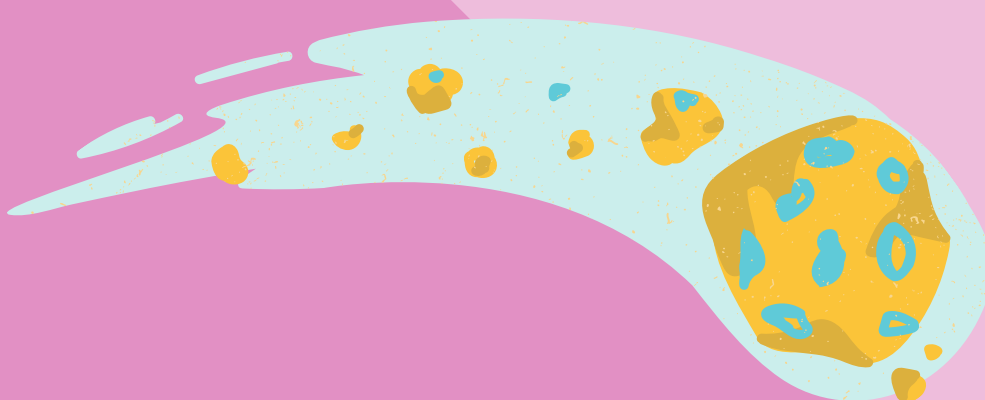

The local group is a collection of about 50 galaxies that are bound to each other by gravity. 100 Trillion years ahead in the future, we will enter the degenerate era when all the stars of the universe will die, leaving behind cool dim remnants eventually. In 100 quintillion years these stellar remnants will either have escaped their galaxy's pool or will have spiralled into the supermassive black hole at the centre. Cillian years into the future, black holes will dominate our universe ushering in a new era called the Black Hole Era.

There are three possible scenarios that can take place. The universe will continue to expand while losing energy and heat in the process. Eventually, the universe will no longer have the energy to produce new planets or stars. This dismal outcome is way far ahead in our future and is known as the Big Freeze. There is another less likely outcome that could happen much sooner. It is called the Big Rip, a mysterious force that's pushing our universe apart, will rip every fundamental piece of every single atom in the universe. Many astronomers estimate this could happen as soon as one trillion years.

The last one and many astronomers believe this is the most plausible way as it is pretty similar to the Big Bang. The big crunch is basically a big bang in reverse. In this scenario, the universe will eventually stop expanding and then suddenly start contracting and then consume itself. Many scientists believe the universe will again become a small compact singularity and will give rise to another universe. As of our observations, we are heading towards the Big Freeze.

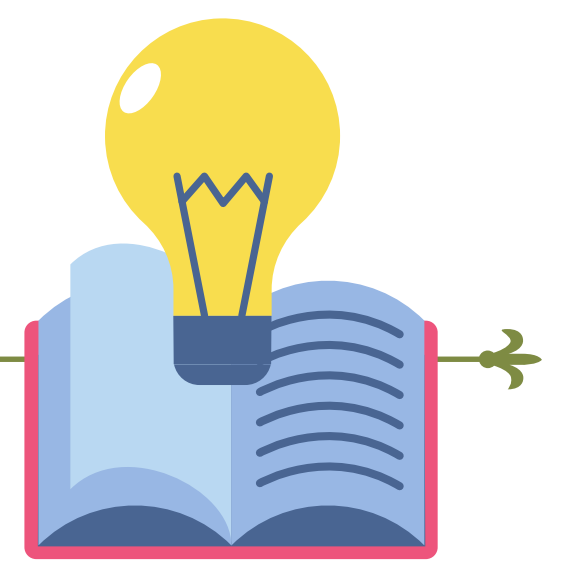

We live at a time in the life of the universe where we can study the journey of the universe "What feels like the end is often the beginning"

AARAV MAHAJAN
CLASS 9TH

ONENESS

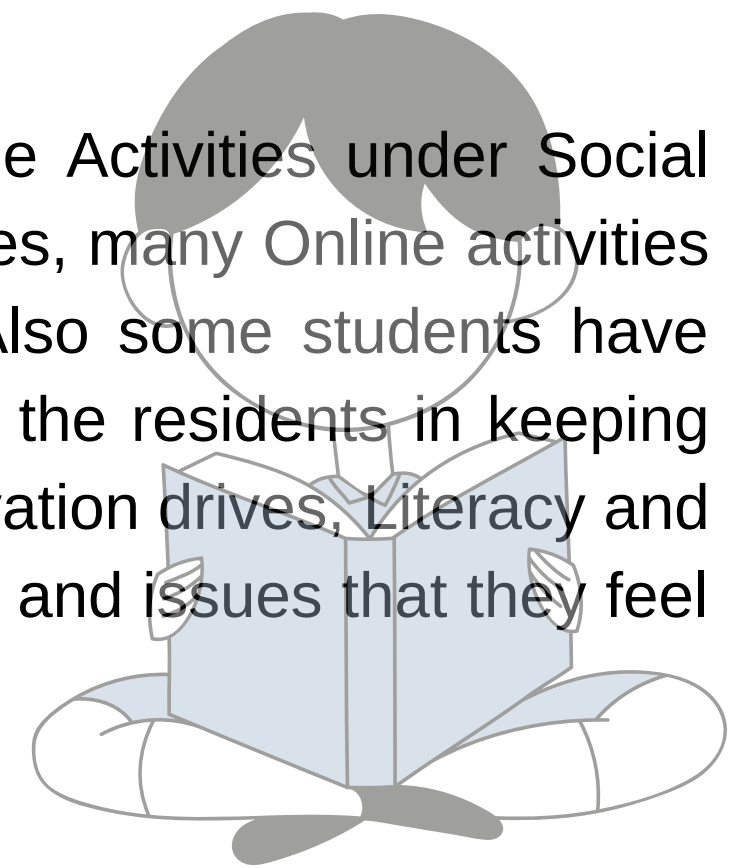

“Do not wait for leaders: do it all, person to person.”

Learning begins at an early age, thus it is important to inculcate certain values in the students and ensure they take pride in being part of the society.

To evoke passion in students and make them aware about their social responsibilities, our School immerses the students in an environment and culture that nurtures a feeling of brotherhood, gratitude, respect, and love for their family, friends, and society. Students are exposed to activities and outreach programs that aim to develop students into empathetic, compassionate and good human beings.

With various social service programs and partnerships with organizations, we help our children to acknowledge and celebrate the dignity of human life; to extend beyond their circles; and to truly learn what it means to be human.

This session amidst Covid, we have undertaken a series of Online Activities under Social Outreach Programme. As a part of our social awareness programmes, many Online activities were conducted like Labour Day, Heritage Quiz was organized. Also some students have gone to nearby villages and suburbs where they volunteer and aid the residents in keeping their surroundings clean, organize plantation, environmental conservation drives, Literacy and happiness drives in old age homes, projects to eradicate social evils and issues that they feel strongly about.

Here is a glimpse of that:

LABOUR DAY

HERITAGE DAY

POSHAN MAAH DAY

**AAINA RATRA
CLASS 8TH**

NATURE'S DIARY

THE WORLD OF 2050

Many scientists are of the belief that the world would be covered by a new blanket of carbon-dioxide based air, while others are of the opinion that we would be at another level of lifestyle and technology. What do you think? Would the world be at the tip of destruction due to wars, famines, pandemics or will it thrive and we all would enjoy our lives together? But I can assure one thing that if we manage to survive and not destroy our planet by that time, then, in 2050, our life could be very different from now in multiple aspects, a vastly different place, artificial intelligence everywhere, and more.

Artificial Intelligence would replace cashiers, help doctors treat patients, manage transportation, and analysis of massive quantities of data and it would be implemented into robots. These robots, in turn, would dominate factories, help teachers, act as police officers and law enforcement.

Around hundreds of sensors would be there on our clothes, in our homes, and in the environment to monitor our day-to-day activities and improve our daily life. In 2050, universal translation would be on another and more usable level, hence, resulting in the removal of all language barriers.

Computers will change in 2050. We might run quantum computers. These are super high-fi computers based on theories of quantum physics. They could deliver massive leaps in computer power. We may be controlling some things with our minds and communicating through brain signals.

Prosthetic eyes and ears will enter the market to cure blindness and deafness. Advancement in genetics might be able to make regeneration possible. Hence, leading to everyone being in the prime of health. Also, by then, genetics would be so strong that we might be able to cure brain cancer, other cancers, genetic disorders, etc.

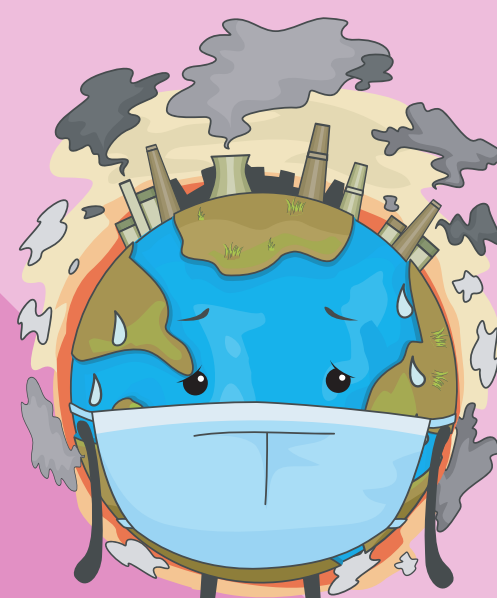

Transportation will also change a lot by 2050. It is expected that the majority of automobiles would be electric. The fuel station would disappear and would be replaced by a home charging station and it's predicted that electric cars would take only 10 minutes to charge. Automobiles would be driverless, as of now Tesla cars have an auto-pilot feature. Other companies like Google have invested billions of dollars in self-driving technologies.

Drones would be parcelling small packages and be used for security and construction purposes also. Maglev trains shall be everywhere in the whole world. It would take only 43 minutes to travel from Los Angeles to San Francisco whereas a normal train takes around 10 hours.

Brain chips like Elon Musk's Neura link will treat neurological disorders like alzheimer's, spinal cord injury, and blindness. These brain chips will allow us to control computers and prosthetics with no physical interaction.

Thus, these chips might as well be the key to exploring our brains. Our energy system has been transforming over the past decade. The cost of solar power has plummeted due to economies of scale and improved technology. The price of solar power has dropped by 89 percent since 2010 and the cost of wind power has plunged as well. We all await our future but don't possess time machines, so please understand that the article is based on assumptions and past graphs. These are just visions stated in videos and other articles.

Well, we can only hope and work towards a better future.

YUVIKA RAJPUT
CLASS 10TH

SENSE AND SENSIBILITY

'A GIFT FROM GOD'

I am very passionate about music. It can lessen the stress, pain, struggle, distraction and bring positivity and calmness in our daily life. Music holds the power to bring people together in different ways. Music can make us expressive and help us in understanding our feelings and emotions in a better manner.

Lata Mangeshkar is the pride of the Indian music industry. Blessed with a beautiful voice, she is the most well known Indian vocalist. Highly versatile, she has sung in more than 20 languages. To honor and give recognition to her works, Lata Mangeshkar is also known as the Nightingale of India. Born in 1929 in pre-independence India, Mangeshkar began singing in her teens, and in a career spanning 73 years sang more than an estimated 15,000 songs in 36 languages.

She enthralled music-mad Indians with her lilting voice and sheer range, singing everything from patriotic songs to romantic numbers, both in films and albums. How to describe her voice? It's that musical instrument that could assume any tenor, any form. It's that gentle warm glow which causes a flicker in your heart. It's a mother's reassurance to her child. It's a voice filled with piety and wisdom. It was a voice that survived eight decades, several generations of actors, it was a voice of hope.

The voice with its divine clarity and oozing melody reassured us that we are never alone. A flick of a button and the voice comes on to lull us into believing that life is worth the heartache. That good things come to good people. That a voice can show us the light and guide us forever. She will be in our hearts forever.

DRIBBLE DABBLE

Squid Game is a Korean-language television series available on Netflix. In this series, about 400 players face off against each other in a competition where they have to compete in a series of children's games to win a considerable amount of money.

Plot:-The plot is relatively simple. Some selected individuals who are heavily indebted are invited to participate in a competition involving six children's games. They have to compete against 455 other players to win a massive sum of money to fulfil their dues and obligations. Now, this doesn't sound very dangerous --- participate and if you lose you are out of the competition, right? Wrong. A harsh truth the players learn during the first game is that if they lose, they get killed. After hearing this, many players quit the competition, but most of them still decided to continue because they had nothing to lose.

Characters:- The characters in this series are fascinating. They all have different reasons to compete in the competition, and they could do anything to win. Each character has another ploy and plans to win the game for themselves. While some players are ready to betray even their friends in an effort to win all the cash themselves, some just want to make friends and win as a team.

Analysis:- At first, I just wanted to watch the different games the players were to play and watch them compete because I thought the show was more or less just like an intensified reality show, but I was wrong. What I found out while watching Squid Game is just more than a few people competing for some money; they have to plan more precisely because if they lose, they are eliminated (literally!). Also, during several episodes, we are told about the miserable lives these people have and why they are so desperate to win the money even if they could die trying.

The games are quite exciting too. One might think that it would be boring to watch a few adults play some kids' games. Still, it turns out it was exhilarating to watch the characters play these games because they have to take the games very seriously, not because they have to win the money but more so because they could die trying. The characters are often faced with a challenging and menacing choice. What I like the most about this show is that it is not predictable, and because of this, the show will keep you on the edge of your seat, and you will enjoy it even more.

At last, I would like to say that the series is a fantastic blend of thriller and drama. The acting is top-notch, and the idea behind the show is equally exciting. All the aspects of the show are perfectly balanced, and I would highly recommend Squid Game to anyone interested in watching a well structured thriller series or even to someone bored and who wants to try something new. Squid Game is also a great way to get into Korean language television series.

SAMRAGYI ASHOK

THOSE LOONEY ONES

“One of my classmates left her mike on by mistake. And in the background she started shouting to her mother that I am not gonna eat this brinjal for lunch. She was basically asking her mum to send her dad to bring some curd, because she wanted to eat kadhi with rice. And then all of a sudden all the other students started shouting towards her "hey kadhi-rice girl " keep your mic off.

- **Abhinandan Dutt (Class 10th)**

There was this guy in our classroom who asked all the other students to set a similar display picture on our Google classroom profiles and his actual intentions were to fool the teacher. When sir came to the class he saw everyone's camera was off and a similar picture was visible on all the profiles which was actually strange. Sir asked if something was wrong to which that guy replied "sir there must be some fault on your side" "let me instruct you to resolve the issue". Sir was like, okay tell me what to do. He basically instructed sir to press alt+f4, which is what we use to shut down the computer through direct command. Sir vanished and we all laughed and got our class dismissed by default.

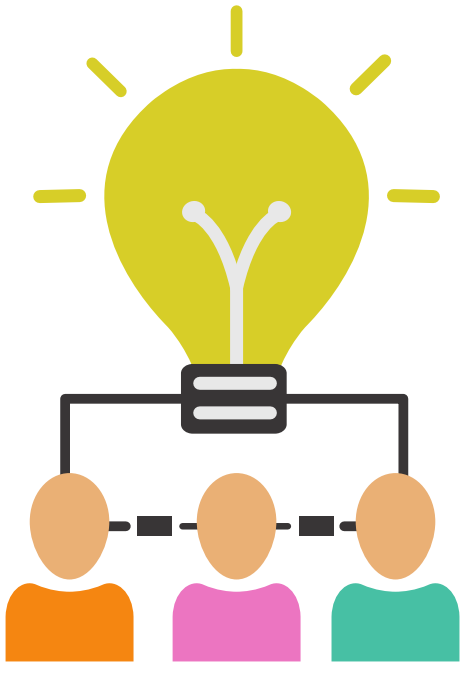

- **Pranav Kumar (class 10th)**

When I was a student in class three. We were visiting Kolkata to spend the summer vacation with my grandmother. She was living there with an uncle. When the train reached Kolkata, we came down and started walking. I was holding my mother's hand. But accidentally I picked another woman's hand. She was walking with us. She had a boy the same age as me. After a couple of minutes of walking, I saw my mom was walking in a different way and I was walking with another woman. I was puzzled and forgot what to say or do. I looked at her face. She looked back and she was also puzzled. I called my mom loudly. My mom came and the confusion was over there. They both laughed and I laughed a lot. I still can remember this incident and I still laugh a lot. My mother sometimes reminds me of this incident.
